Workflow Actions

- Contract Billed
- Contract Paid
- Contract Cancelled
- Show Invoice

General Information

State: Paid

Created On: January 14, 2013

Billing Location: Headquarters

Total Price: \$1,995.00

Always know your customer's latest contract information. Get their serial numbers, products, contract term dates and the item locations. You can also grant portal access to your customers. They can login to see all of their active contracts and items they own through you. Providing budgets and contract summaries has never been easier.

Getting your customers and product data into Renew is simple. Instead of manually entering in every item, export a CSV file with your data from your current system. Grab that file and use our Import Wizard to map all of the appropriate fields. You can always go back and edit your information too, so everything is always up-to-date.

Our integrated workflow ribbon will keep you, your users, your partners and your customers on track. Know when the contract has been billed, paid or cancelled. You can also generate a PDF invoice copy to send with all of the contract details on it. When it's time to Renew the contract, simply click the next workflow button and you're done.

IT'S TIME TO PLANT THE SEED

Watch your contract database grow in real-time with Renew. With unlimited access to your information from any device, secured hosting services and unsurpassed insight, your team will never look back.
